MULTI-ENGINE RATING COURSE WITH INSTRUMENT PRIVILEGES

The Multi-Engine Rating Course with Instrument Privileges is designed to teach you stalls, maneuvering during slow flight, steep turns, emergency procedures, VMC demonstration, drag demonstration, engine failures on take-off, cruise and landing, and instrument approaches with both engines operating and with one engine inoperative. The Multi-Engine Rating with Instrument Privileges is earned by passing a check ride with an FAA-designated examiner. The Multi-Engine Rating Course will fully prepare you for this check ride and train you to fly a multi-engine aircraft in a wide range of conditions.

Requirements: You must hold a Private or Commercial Certificate with Instrument Privileges to complete this course. The average course completion time is around 10 hours. Additional instruction may be necessary depending upon the abilities of each individual student. We recommend students fly at least twice per week. Pricing shown below is for a Part 61 program. Pricing for the Part 141 version of this course is available from our staff. An option to complete this course without having an Instrument Rating is also available under both parts. Ask our staff for details.

Package Details: Our package includes training materials and flight hours that you will need to complete the course. Purchasing a package locks-in aircraft rental and instruction rates for six (6) months from purchase date, although you will still be subject to an additional charge if you receive the Renter's Insurance discount price and elect to discontinue your coverage. If you complete the program in less time than offered in a package, the remaining funds are available for your personal use.

The Multi-Engine Rating Course with Instrument Privileges Package includes the following:

PACKAGE: \$3,059.00*

Without Renter's Insurance: \$3,389.00*

\$43.00 savings versus pay-as-you-go rates.

- 10 Hours in a BE-76
- 8.5 Hours of Flight Instruction
- 3 Hours of Ground Instruction
- Jeppesen Multi-Engine Kit (\$120.00)

** Subtract the cost of the Kit for students providing their own training materials (part 61 only). This cost does not include any necessary flight publications or applicable sales tax. For those students who want to pursue their certificate on a pay-as-you-go basis, please refer to published aircraft rental and instruction rates. Financing options are available through third party lenders.*
